FS2004 Hiller Model HU-12/ OH-23G Helicopter

Description: Rugged and dependable, the Hiller Model UH-12 Helicopter first flew in 1948, and also entered U.S. Army service as the OH-23A through G. They served until the late '70's as trainers, utility and liaison, and as medivac helos. Always overshadowed by the more famous Bell Model 47, the Hillers gave sterling service throughout their careers. Also saw service with the US Navy and dozens of forces around the world. My first FS chopper, model has four paint schemes, VC, some custom gauges, and rotor cyclic anim's.

FS2004 Mh-53

Description: In Memory of Rory Kelly (aka Wolfy) This Mh-53 has been redesigned to match the real aircraft as close as possible. I did add some gauges that are not there in the real world but it was only because there is no Flight Engineer in the game to call out things like altitude and airspeed or fuel for that matter. I took gauges from the internet that were as close as possible to the real aircraft. Gary andchristy

FS2004 Mil MI-24V Hind E

Description: Deadly looking, and just as lethal, the Mil MI-24 series of Helicopter Gunships are perfect Cold War images of the Soviet concept of a "Flying APC"

Armed with AT Missiles, Rockets and Cannon, and capable of transporting 8 Troops in its cabin. Caused much concern in the West, where there was no counterpart, and given the NATO code-name "Hind" MI-24's were first built with conventional flightdeck-type cabin, as the MI-24A, then redesigned with the stepped, armored cockpits for pilot and weapons systems operator (wso), as the MI-24D. Later improvements resulted in the V, VP, P, and Recon versions. Was, and still, in service with over 20 nations. Tim Piglet Conrad
