FS2004 North American Aviation XF-108 Rapier

Description: The XF-108 was designed as a Mach 3 long range interceptor primarily to escort the XB-70 Valkyrie. It got as far as the mockup stage before the project was canceled. This model is based on the mockup configuration and has the usual FS9 animations, transparent canopies, and a specular color shine. The 2D panel and VC are based on a photo of the front panel of the mockup. The sound file is from a tape of a actual GE J-93 engine. By Paul Clawson
