FS2004 A300/A310 GE-CF6-80C2A Series V3.1 update

Description: Well guys, If you downloaded my previous version you'd know that I clearly stated "final version" well apparently that isn't the case anymore. After enjoying my new sounds for a little over a month now (not to mention countless edits... eyes roll) I wasn't very pleased after all. I found that the wind sounds were to loud aswell as the engines themselves. So I changed the volume of those respective files and was happy with what I heard.Hope you'll enjoy this update as much as I do (since I'm so paranoid about this and that, lol.)Serafino Jr

FS2004 Airbus 380 Soundset

Description: Airbus 380 Soundset for Skysong Soundworks. Its a bit of a guess as to how the aircraft will sound. I gave her a big howling fan sound. All original heavy duty gear, flaps, roll, startup shutdown. By Aaron R. Swindle

FS2004 Authentic General Electric CF6-80A Sounds For The Boeing 767

Description: Authentic General Electric CF6-80A Sounds For The Boeing 767 These Sounds were the results of two months of hard work. Every Small aspect of these engine's characteristics are captured in this soundset. This is the first soundset made exactly for the CF6-80A Engine Commonly found on 767-200s and Older A310-200 aircraft. All of the interior engine sounds were exclusively recorded from the business class cabin of an American Airlines 767-200ER on a flight from JFK to Miami. The exterior sounds were only taken from the finest recordings of the CF6-80A engine. I'd like to furthermore also present to you FS Sound Project's first release, for tech support or if you'd like to comment on these sounds please visit us at www.fssound.cbj.net. Feel free to use this on CF6-80C2B Powered 767-300s aswell they sound almost identical. Please Enjoy!!!Emil Serafino Jr. (FS Sound Project)
