FS2004 Halo Texture file version 3

Description: The halo texture file changes several lights in Fs2004..My attempt at halo version#3 now makes taxi lights appear brighter blue .The strobe at runways and strobes only at runways gives off a color that makes it appear to have a reflection onto the ground. From all other versions of my halo texture file this is the most realistic attempt to this date. This texture file has been re-done to provide more realistic features.The file is in DXT3 format.As crazy as it may sound, I spent over 100 hrs messing with this file to get it the way I wanted it to look.No setting changes to anything else is needed .The file was tested on a very fast system so results may vary from system to system at this time it is unknown.Have fun..by Sandon Lyon.

FS2004 More Waves II

Description: This is a new effect to improve the visual of the waves along the coast.I always desliked the "shy" way sea waves looked like in FS. For this reason, the idea of Sascha Rieger (realwave.zip), improving coast surfing was excellent.I've tried to balance the movement and sight of the waves based on two points:- To have more than a single line of breakers reaching the beach, like the ones we have mostly in S. America east coast.- To have an acceptable sight in the waves of lakes and other coastal places where the FS runs a lighter kind of surf.If the result is not so bad, it certainly can be improved...and that's the beauty of the way continuous improvement works...by Luiz Alvarenga.
