FS2004 Indian Air Force Sukhoi Su-30 Flanker

Description: Indian Air Force Sukhoi Su-30 Flanker; utilizing Daniel and Denis da Silva's Su-27 model for FS2002. This is a modern multirole aircraft in the same class as the F-15 Eagle, in terms of size, range, and payload. This aircraft was originally for FS2002, where all of its animations and features are visible. It is polygon-low enough to use in FS2004 as an AI aircraft, but suffers some small visual handicaps, view the enclosed readme file for further details; but it looks very nice at any rate. Model and master textures by the da Silvas. Enjoy! Mike Pearson, Peoria, Arizona USA

FS2004 Lockheed C-141B Starlifter (L-300) AI Model for FS2002 FS2004 ATC

Description: This model was built with FSDS version 2.24, primarily for use as an AI model in FS2002 and FS2004's ATC traffic. It's simple, low polygon design make it ideal for AI traffic use. Credits: Thanks to Dee Waldron for his FSDS technical support, unlimited patience, and for getting me started in FS modeling. Legal Stuff: Copyright 2005, Henry Tomkiewicz. All rights reserved.
