

## FS2004 Real Airlines AI Traffic

Contributed by Tamer Cem  
Friday, 27 July 2007

### FS2004 Real Airlines AI Traffic (USA)

Description: With only USA planes. This package includes many types of planes -all optimized for AI (fps friendly) in real airlines liveries. Most of the planes feature AIS (Animated Inbuilt Scenery) - they have animated scenery while parked with engines turned off. It makes FS2004 very realistic. More INFO in Readme.txt. By Piotr Sobczak.

Version: v.1 Filesize: 14.77 MB

### FS2004 South African Airlines AI Traffic v1.0

Description: FS2004 South African Airlines AI Traffic v1.0.

These flight plans include the 2004-2005 winter flight scedule but still might not be the original flight plans from South African.

Below I have included the aircraft that comes with this scedule.

"Boeing 737-200"

"Boeing 737-800"

"Boeing 747-400"

Also updates the contrail effect.

### FS2004 Ukrainian Air Force Sukhoi Su-35 Super Flanker

Description: Ukrainian Air Force Sukhoi Su-35 Super Flanker (no reference photo); utilizing Daniel and Denis da Silva's Su-35 model for FS2002. This is a modern multirole aircraft in the same class as the F-15 Eagle, in terms of size, range, and payload. This aircraft was originally for FS2002, where all of its animations and features are visible. It is polygon-low enough to use in FS2004 as an AI aircraft, but suffers some small visual handicaps, view the enclosed readme file for further details; but it looks very nice at any rate. Model and master textures by the da Silvas. Enjoy! Mike Pearson, Peoria, Arizona USA
