FS2004 The Oil Rigs Scenery in Diao Yu Island (DIAO YU TAI)

Description: FS2004 The Oil Rigs Scenery in Diao Yu Island (DIAO YU TAI) The Kantan 3 is a semi submersible oil rig, owned by the Shanghai Offshore. It has been used extensively in the China Sea's for oil and gas exploration. A semi-submersible is a floating platform that can be towed or self maneuvered to just about any location, when in position it will "sink" part of it's hull so that just the top of the supports and main topside are still above the surface, once stable it can start drilling. Due to it's mobility, semi-subs are used primarily for exploration and test drilling. The Kantan 4 is operated by Maersk Offshore and is currently deployed in the Gulf of Mexico. FS2004 The Panama canal I

Description: The Panama canal looks rather strange in the MS default scenery for FS9: on the Pacific side, the locks are made as separate scenery objects, but much too large and sitting on top of the ground, on the Caribic side the Gatun lock is only roughly indicated (and again much too large). With this scenery I tried to improve the default scenery in several ways winfried orthmann

FS2004 TINIAN ISLAND AND NORTH FIELD

Description: This package includes:

- * New terrain, shoreline, road files, land-class and water-class files for Tinian Island.
- * A reproduction of Tinian North Field in 1945, including:
 - * runways and taxiways
 - * roads and buildings
 - * B-29s parked at their hardstands.
 - * The field includes a couple of R4-B Sikorsky helicopters, one on the ground and on hovering over the field.
 - * A small convoy of WW II Liberty Ships and Fletcher Destroyers circle the island.
 - * Two Liberty Ships unload in the south harbor.

FS2004 Trenton-Mercer County airport in Trenton

Description: This is a fairly close representation of Trenton-Mercer County airport in Trenton, New Jersey. Not being a scenery designer... the airport enhancement of the default scenery was made with both Lago's Scenery enhancer and Runway 12 (mostly for aircraft and a few of the Vehicles.) You Will need both Lago's scenery enhancer and Runway12 - one being payware - the other freeware. One major addition was made to the airport, using Lago - Trenton-Mercer's new Executive hangers and/or office-supply space which is located to the left of the main terminal. Mercer County is primarily an Executive Airport... represented well with Flightsim's default scenery (Note: the larger of the two terminals IS the Executive Terminal. Remember too, if you have lago ... click and start the scenery editor... you will see trenton-mercercounty show up in the menu... if you highlight and click on that.. I do believe you will be able to add your own little special touches to the existing file... if you do and you think they came out particularly well... e-mail me... would LOVE to replace mine with your additions Dalecaruso.
