### FS2004 DeHavilland DHC-3 TTC Super Otter Final Version

Description: Montana Air DHC3 Turbine Otter This is a repaint, and slight reconfiguration of the excellent Eugene Hayart model for the Turbine Otter. In this package, I have included the "empty" model, with a reconfigured wieght and balance to allow for loading of passengers and cargo via the FS9 W&B utility. Also, I have added woodgrain to the panel, and changed some of the gauges. The woodgrain is reflected in the VC and spot plane modes as well. Uploaded by Fred Choate.
